AI-powered Location Intelligence Services Boosts Patient and Visitor Satisfaction

Mr. Keith TSUI

Vice President - Data & Analytics, Cherrypicks, HKSAR

Personalized location services can transform your audience's indoor navigation experience becomes an user-centric experience. In medical world, it can also greatly improve the journey of a patient and the corresponding carer in complex medical properties, which provide different types of acute care, comprehensive specialty care, advanced diagnostic services, multispecialty outpatient clinic, and other wellness services. With proper integration with system backend, the transparency of a patient journey and the satisfaction are enhanced significantly. In addition, service providers can also deliver a more engaging experience for their patients and visitors.
